

Tan Egoista!

OSS to level up your career, reputation or to get your first job

Andrea Liliana Griffiths

 @alacolombia

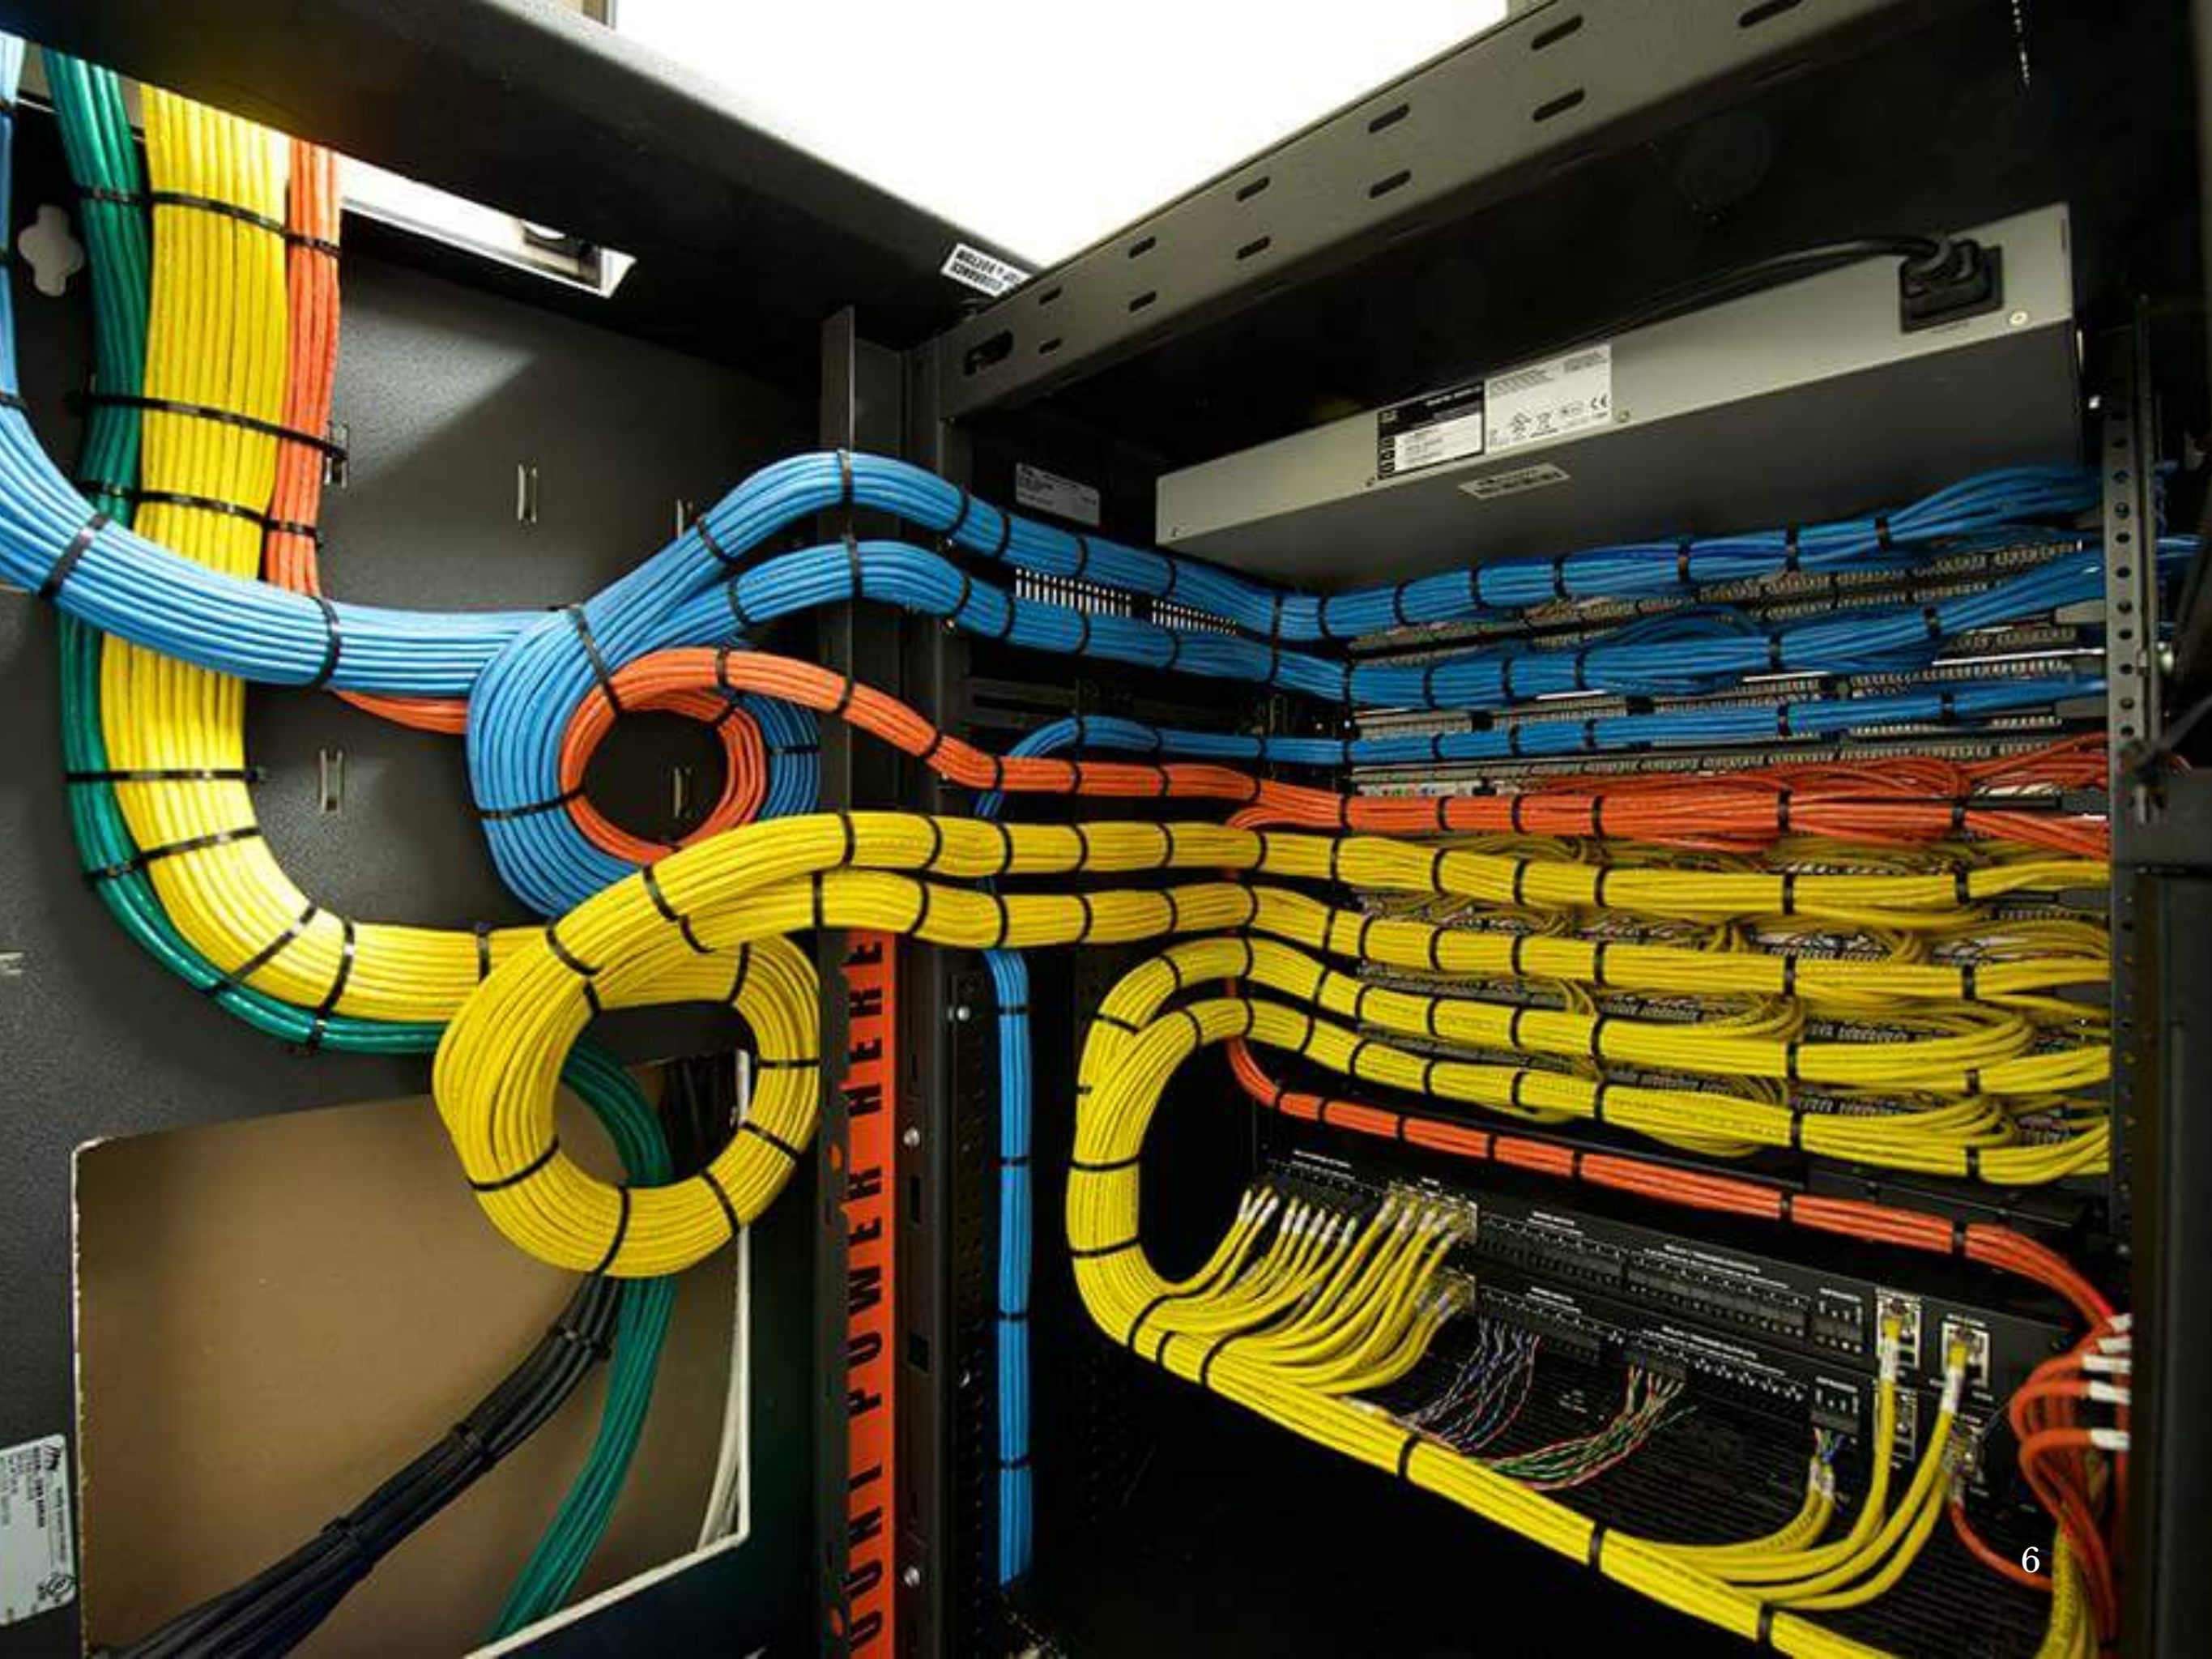

**Todos aquí hemos
obtenido gran valor de
Software de código
abierto, y hay muchas
maneras de apoyar el
progreso de el software
de código abierto
y apoyarte a ti mismo.**

Egoísmo Ético 101

Cuidando tu propio interes

CLUB EGOISTA

- ¿Porque?
 - Usa tus contribuciones para alcanzar tus metas!
- ¿Donde?
 - El ecosistema de software de código abierto
- ¿Como?
 - Combinando tu astucia y los principios de esta charla

Uno de los aspectos únicos
de el software de código
abierto

es que **TODOS** podemos
contribuir...

Proyectos de código abierto de más rápido crecimiento 2019

1. Microsoft /vscode
2. MicrosoftDocs/azure-docs
3. Flutter/flutter
4. Firstcontributions/first-contributions
5. tensorflow/tensorflow
6. Facebook/react-native
7. Kubernetes/kubernetes
8. DefinitelyTyped/DefinitelyTyped
9. Ansible/ansible
10. home-assistant/home-assistant

Contribuciones para lograr mis metas

Soy nuevo aquí, y quiero contribuir...

Buscando en GitHub

— Utilizando "search parameters"

A screenshot of the GitHub search interface showing various filters. The filters are arranged in a list on the right side of the page. The first filter is a text input field containing the word "kittens". Below it is a section titled "Repositories" with a sub-header "Repositories". Under this section, there are three more text input fields: the first contains "github, joyent", the second contains "twbs/bootstrap, rails/rails", and the third contains ">YYYY-MM-DD, YYYY-MM-DD". At the bottom of the filters, there is a dropdown menu labeled "Any Language" with a small upward and downward arrow icon.

Notas para empezar:

- Oportunidades existen
- Decide el tipo de proyecto y contribution
- Escoge una comunidad amigable
- Empieza!

Mi meta es: "Quiero avanzar mi carrera"

- Proyectos de código abierto en tu trabajo
- Utiliza buenas practicas
- Proyectos avanzados y dirección de equipos

Contribuciones con enfoque

- Usa tus metas para dictar a qué proyectos contribuyes
- No parez de actualizarte!

Video

Why Use Statically Typed Languages?

Gabe Berke-Williams & Ian Anderson

Notas para avanzar:

- Encuentra el bug o issue de un proyecto que usas en tu trabajo diario
- Elige la mentoría
- Dedícale tiempo a las buenas prácticas (pruebas, refactorización, optimizaciones etc.)
- No perez de capacitarte

Mi meta es: "Quiero conseguir mi primer trabajo"

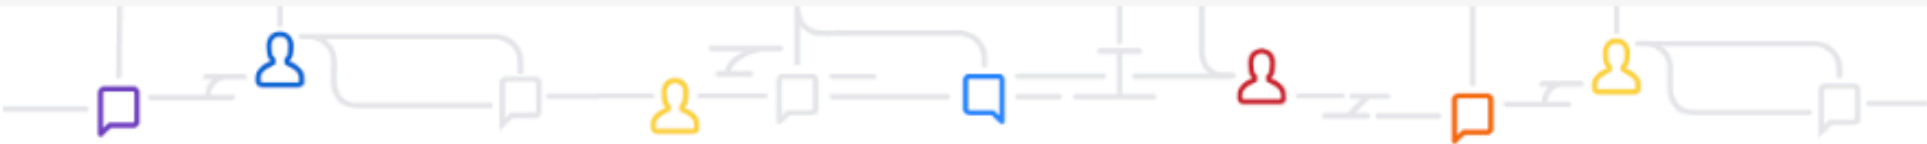

- Evalúa tu presencia en la internet
- Presencia en software de código abierto
- Preparación para entrevista
- Integrate con la comunidad
- Embrasa la humildad

Tu presencia en la internet

- La internet es para siempre
 - Si es algo que no le mostrarías a tu jefe no lo publiques!
- Recurso:
 - Curso de marca personal
<https://appsco.platzi.com/clases/>

— Recurso: Optimizando tu pagina de GitHub (<https://bit.ly/2CJPQxS>)

Optimizing your GitHub profile

yamiacat Ground Controller Lvl 1 ...

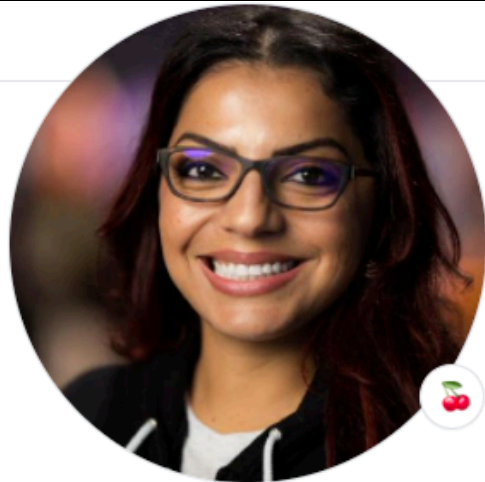

GitHub isn't a social network - it's a development platform - so what kind of content do you need to put in your GitHub profile? In this article, we'll talk about who might be looking at your GitHub profile, and share some tips to help you make the best possible impression on your intended audience, whether that's potential employers, clients, or other developers!

Who is your profile for?

GitHub is a platform for "social coding", with an emphasis on the coding! Unlike fully fledged social networks, there is not much emphasis on providing personal information and building up a pretty and informative profile. But you *can* build a profile, and if you're going to build one, why not build the most effective one possible?

To decide what is an effective GitHub profile, and optimize for that, first you need to decide who you are optimizing it for. There are several possible audiences we will consider in this article:

- You might be a developer looking for employment with a company.
- You might be a freelancer, looking for your next contract.
- You might be an open source contributor, looking to join an open source project.

Hiya! I'm Andrea, my pronouns are she/her/hers.

I'm a Community Support Human @GitHub, 🇨🇴 Immigrant Latina in technology, OSS superfan, & breast cancer slayer.

📦 I'm currently working on:

- Supporting **you** in GitHub's [Community Forum](#)

📖 I'm currently learning:

- All things Discourse since is our new platform
- [GitHub CLI](#) because is awesome
- To work from home with a full house

💡 Ask me about:

- Anything, I'm always happy to help in any way that I can.

📞 How to reach me:

- I'm [alacolombia](#) on twitter 🐦

😄 Kinda fun facts:

- 🎮 ACNH is my fave
- I have two littles ages 4 & 7 and 🐶 the best goldendoodle ever

Crea tu **readme.md**

1. Crea un repositorio que tenga el mismo nombre que su nombre de usuario de GitHub
2. Inicializa el repositorio con un archivo README
3. Comienza a editar el archivo README

Tu presencia en el software de código abierto

- A quién conoces?
- Igual como tu hoja de vida que tus contribuciones reflejen tus intereses
- Considera el tipo de compañía en tu mira
- ***Recordatorio*** el mundo esta cambiando, ya no solo pesa importancia de donde te graduaste pero el poder demostrar lo que puedes hacer!

Practica para entrevistas: HackerRank, CodeFights, LeetCode, exercism.io

The screenshot shows the Exercism website homepage. At the top, there is a dark header with the Exercism logo on the left and 'Sign up' and 'Log in' links on the right. The main content area features a large illustration of a person with glasses and a bow tie sitting at a desk with a laptop, with colorful horizontal bars floating around them. To the right of the illustration, the word 'exercism' is written in a teal font, followed by the tagline 'Code practice and mentorship for everyone'. Below this, a paragraph states: 'Level up your programming skills with 3,388 exercises across 50 languages, and insightful discussion with our dedicated team of welcoming mentors. Exercism is **100% free forever**.' Two buttons are present: a purple 'Sign up' button and a teal 'Explore languages' button. Below this section, a row of logos indicates where Exercism has been featured, including 'the changelog', 'CODESHIP', 'CODE:NEWBIE', 'WIRED', 'opensource.com', 'SD Times', and 'LINUX'. At the bottom, the heading 'Available language tracks' is followed by the text: 'There are 50 different language tracks on Exercism for you to explore. Which one will you choose to learn first?'.

- `GitHub.community`

Integrate con la comunidad

- Meetups/Conferencias
- Propone un "lighting talk"
- Se voluntario

Participación activa para las cosas (de pronto) no tan interesantes

- Tareas tediosas o que consumen mucho tiempo
- Pruebas funcionales
- Pruebas de rendimiento

Notas para conseguir tu primer trabajo:

- Que este todo en orden, desde tu marca personal, tus perfiles sociales y de GitHub
- Practica para entrevistas
- Integrate con la comunidad

No tienes que saberlo todo, solo demostrar la capacidad de aprender!

En conclusión

- Contribuye con enfoque
- !No te olvides se egoista pero humilde!
- Puedes continuar siendo un buen ciudadano y contribuidor de código

Conectemonos:
